April 24, 2020

Hello families and friends, Another Safe week.

Another week has flown by. If you were here, you would observe that we have created our quarantine, Covid unit as required by CMS. A huge thank you to those we had to displace. We have rooms, 101, 102, 103, 104, first on your left on Bridge Wing, designated for new admission quarantining for 14 days, as needed, and residents we test for Covid. These rooms have been sealed with plastic and zipper for entry. Those in these rooms are on precautions. So we wear masks, gowns and gloves when entering. Should we have a positive Covid case, we will further isolate those rooms from the general center with a plastic wall barrier. Close entrance from the lobby area to our specific workforce only. We are working to assure it is a secure and safe work environment for our staff members and keep the virus contained. We double check ourselves through each step.

Everyone is adjusting to just see just our beautiful eyes over our masks.

I have found a company who is making us extenders so they are comfortable. Another friend is making more cloth masks over the next week in larger sizes too. And a company is sending me little blue hearts for us to wear to show our survivor strength as inspiration. A staff member's family made headbands for staff so their masks are more comfortable. Great support and unity together.

We have great support in getting the PPE we need. Any and all tips are welcome. Staff saw me modeling our Covid positive PPE. See me below.

We are welcomed to work with signs now thanks to our Catholic Charities home office

Thanks again for your support during these challenging times.

Kindly,
