Hello families, friends and residents,

Today, we tested everyone again. For our staff members, we have made it a condition of employment that they participate in all testing. We have had great cooperation. They tell us we will get results in 4-7 days. This testing was performed by the National Guard (MMRS) for all staff and residents.

Our kitchen staff, who have been quarantined, return tomorrow. The sanitation was done, and follow up cleaning, post sanitation, was completed today. We were blessed with the support of the NH Food Bank and a great team to get meals out to everyone. We are happy our staff has stayed well and joined us for testing as well.

It has been a little hectic with everyone pitching in. Sorry for any missed DUO calls or window visits. We know they are important for all. Please call and reschedule and let me know if you run into any challenges.

We participate weekly on conference calls with Public Health; with Drs. Chan and Talbot and Elizabeth Daley. We follow their guidance. They have been very supportive of centers and their struggles to keep staff and residents healthy. With our towns opening up, we understand that this exposes our staff to more opportunities to be exposed. We remind them to remain careful and safe. We cannot open up our center to more opportunities for exposure.

Thanks for your support!

Kindly,

A handwritten signature in black ink that reads "Luanne Rogers". The signature is fluid and cursive, with a large, sweeping flourish at the end.
