July 31, 2020

Hello Families, Residents and friends,

Another month has passed. Good bye July and welcome August. Today is a lovely day for our Gazebo visits. Call to schedule yours.

We got all our test results back from our 7/24 testing. All negative, so the Department of Health released us back to Surveillance testing. We will now be testing all Staff and 10% of residents every 10 days. Our next testing falls on Monday 8/3. Since all testing is being brought back to NH based Laboratories, scheduling is coordinated by the LTC testing unit to assure the numbers of tests going to the labs are balanced, so that we can get high quality and timely results. We will be assigned our testing dates going forward, but they should keep us on an every 10 day cycle. We had gotten in to a rhythm of every week on Thursday testing but we must learn a new tricks. I should have next Monday's results by next Friday.

Good news – Phase 1 reopening protocols have been approved for Hillsborough County nursing centers. We are now allowed to have small group (up to 6 residents) activities and dining with social distancing. Pam has been planning and plotting. Since it is only up to 6 at a time, 1-1 activities remain primary.

At this point, we have no one on quarantine, except new admissions for 14 days, so call for your outside visit time.

Have a great weekend!

Kindly,

A handwritten signature in black ink that reads "Luanne Rogers". The signature is fluid and cursive, with a large loop at the end of the last name.
