Families, friends, staff and residents,

I unfortunately need to share that we have had 3 residents test positive for Covid today. We are now testing, with our Point of Care antigen testing, any other residents with flu like symptoms, if your loved one is being tested, our nursing staff is reaching out to you. This puts us into outbreak status and we are closed to all visitors. All residents will be asked to stay in their rooms. We are using full PPE in the care of all our residents. We are reporting our results to the Department of Public Health and following their guidance.

We tested Staff yesterday during surveillance testing and will be looking for results starting tomorrow. We have notified all our coworkers this afternoon as well.

I will keep you informed as we progress. Thanks for your support.

Kindly,

A handwritten signature in black ink that reads "Luanne Rogers". The signature is fluid and cursive, with a large, sweeping flourish at the end.
