October 15, 2020

Families, residents, staff and friends,

We have 7 residents that have tested positive, either through our POS quick 15 minute test on Tuesday or from our Monday 10/12 surveillance testing. We have had 2 staff members test positive as well. Today, the Mobile testing unit tested all staff and residents, they tested with the most accurate testing method. They will bring those samples to the public health lab. We anticipate results in a couple of days. I will update you with those findings.

All our positive cases have been on one wing. We have all residents on precautions as if they were positive, in order to contain spread. We have closed all the doors, and we are dedicating staff to work only that wing. We are following the direction of public health. They assure us we are doing what we need to do. We are in touch daily.

We will be testing everyone, staff and residents again next Thursday. We will continue to test weekly, until we have 2 weeks in a row with no new positives findings. Then we will be out of outbreak status.

Sadly, this does not allow inside visitors. Please let us know if you would like a video call or room window visit.

Thank you for your prayers.

Kindly,

A handwritten signature in black ink that reads "Luanne Rogers". The signature is fluid and cursive, with a large loop at the end of the last name.
