Hello Families, Residents, staff and friends,

We welcomed Laura Szabo, RN as our interim DNS this week. We are busy getting her up to speed. She has many years of experience as a nurse and DNS to share with us. And she has Covid19 outbreak experience to help us.

Our weekly testing continues. Yesterday, we tested all current negative staff and residents. Results usually arrive on Saturday. I heard today from one of our contracted nurses that she tested positive today. I fear that the spread in our community is putting our staff at great risk as well.

We had an infection control inspection today and we were given positive feedback on how we are handling this outbreak. We are constantly reminding staff on how to protect the residents and themselves.

To date we have had 31 residents test Positive for Covid19, currently caring for 23 Covid19 positive residents and we have lost 8 resident family members since March 18th.

Please continue to keep us in your prayers and pray with us for healing. May the Lord keep us in his healing hands.

Kindly,

A handwritten signature in black ink that reads "Luanne Rogers". The signature is fluid and cursive, with a large, sweeping flourish at the end.
