December 29, 2020

Hello Families, residents, staff and friends:

Last week I shared that we had 2 staff members test positive in our weekly testing. We had a positive staff member the week before. That made 3 staff members in 2 weeks. We are again considered in "outbreak" status. We have no residents with symptoms and Positive staff have been quarantined. We are back to testing all residents and staff weekly through the National Guard. We are testing today. Hope to have our results before the end of the week.

Yesterday we held our first COVID-19 vaccine clinic with the support of Walgreens pharmacists. We have partnered with Walgreens to get this vaccine to our residents and staff as part of the vaccine roll out to our most vulnerable. We vaccinated 51 residents and tenants of Bishop Primeau senior living and 36 staff members. Anyone who did not get their first dose of the Pfizer-BioNTech vaccine yesterday, will have a second opportunity on January 18th. This also the date all of us who got our first dose yesterday, will get the second dose. There will be a third vaccine clinic, 3 weeks later on February 8th to get the second dose to those from January 18th. We are continuing to educate everyone on the benefits of the vaccine.

Kindly,
