August 3, 2021

Good morning,

We continue to work in conjunction with Manchester Dept. of Health, following guidelines and recommendations given. Yesterday, all staff and residents were tested (pcr) and results should be obtained over the next 48 hours. We know that this current set back has been stressful for all parties involved. We are continuing our approach of full ppe, (gowns, gloves, n95's mask, surgical masks and eye protection). Our hope is that visitation can resume soon. We must have two rounds of testing without further positive cases. The numbers of positive covid cases in the community are rapidly rising which is concerning, but we are optimistic.

We continue to stay in daily contact with Public health and following their guidance.

Thank you for your prayers and support.

Edit (2021.08.03 16:57): Currently we have received approximately half of our results back. We have no new positives to report. We will update tomorrow when the rest of our results are obtained.

Thank you again for all of your support.
