To our Residents and Family members:

This morning one of our staff members reported that they had tested positive. This staff member has no direct contact with any residents but does have contact with other staff members. We have tested staff that they may have had contact with and all are negative at this time. There is no plan to test residents unless a direct care staff member or resident family member tests positive. We will keep you updated if there are any additional positive cases.

Warm Regards,

Rachel Uboldi
Administrative Assistant
